The largest arts centre in the Midlands.

Warwick Arts Centre is the largest arts centre in the Midlands, attracting around 280,000 visitors a year to over 2,000 individual events. The Helen Martin Studio is a new-build studio for a wide range of uses including orchestra rehearsals, art installations, and performance experiments.

What has been enormously successful about this heavily-used studio is watching it come alive when occupied by students--whether for a drama event or a musical event. The simple adjustment of the acoustic by extending or retracting curtains works well, and the sound-diffusing columns and beams provide a suitable architectural frame for performers and performances.
